Moment Test Plan

Jason Pritchard
Last updated just a moment ago

Summary

| Version	Version 1.8	
Status	COMPLETION	
Overview	Moment is described as "A peer to peer experience platform" from an AirBnB clone.	
Requirements	Requirements are assumed and defined by QA The requirements are equivalent to an Airbnb "experiences". As it is a clone as stated by developers.	
Application	https://airmoment.live/	
Stakeholder(s)		
	Matt Shields / Developer and Primary contact	Slack ID: UCCHJBEN7
	Jemila Al-Ghani / Developer	Slack ID: UC78F312L
	Jason Pritchard QA Engineer	PritchardJasonR@gmail.com	Slack ID: Jason Pritchard

Approach / Strategy

Tests will be executed on Google Chrome and Firefox.

Begin with testing account creation and management. Then making reservations and purchases. Hosting Experiences accepting reservations. Financial exchanges, Searching and Filtering. Reviewing the experiences. When first round of manual tests complete begin writing automation test scripts for regression tests. While testing against these functions bug reporting with screenshots and proper tracking.

Risks

Project risks

- No requirement documentation will lead to bugs being miss identified, not identified or false positives.
- Profile page is ugly photo formatting for a standard android photo photo is distorted. Random date on the side after location field, unsure if that is related to today's date or date account was created. Doesn't seem necessary with no tag
- Identifiers and Directions are very vague on all pages.

Test Results by Executions

● PASS (17) ● FAIL (15) ● WIP (0) ● BLOCKED (5) count per **1d** | (37 hits)

Executions by Cycle

● Moment Chrome (19) ● Moment FireFox (18) ● Ad hoc (1)

- Lack of Firefox support

Accounts

- Can't edit once saved.

Filters

- Only one category at a time.
- Identifiers and Directions are very vague on all pages.
- Will generate user errors.

Hosting

- Can Not delete hosted experience.
- Should be able to select more then one category
- -1 was used for price in firefox fields accept negative ints
- Some of the tips bullets have periods some don't
- 1 guest minimum 10 maximum
- If more then 1 date selection allowed ability to enter different times EG. Hike in the A.M. than again in the P.M. could increase usability

Reviews

- See more button lock up
- Unable to submit a review
- Stars for star rating covered by submit button
- Hard to recognize drop down has happened

Typos,formatting and buttons

- Shopping for experiences typo: What will we'll do
- Formatting on right of Review page

Features to be tested

Feature	Test Criteria	Test Suite Containing Cases for Objective	Testing Status	Identified Bugs By Objectives Tested	Bug priority by color
User Account Creation	• create account • Challenge create account • Login • Challenge log in	◇ Q10J-105 - Account Creation Suite **TO DO** Refer to GitHub for Automation scripts	COMPLETION	■ Q10J-140 - Create User typo **OPEN**	140
Searching and filters		◇ Q10J-118 - Searching and Filtering **TO DO** Refer to GitHub for Automation scripts	COMPLETION	■ Q10J-144 - Search by text filtering **OPEN** ■ Q10J-142 - Search Field stay dropped down **OPEN**	144 142

Feature	Test Criteria	Test Suite Containing Cases for Objective	Testing Status	Identified Bugs By Objectives Tested	Bug priority by color
Hosting Experiences	• Description • Price • Location • Photos	‹› Q10J-119 - Hosting **TO DO** Refer to GitHub for Automation scripts	COMPLETION	◻ Q10J-141 - Unable to delete host **OPEN** ◻ Q10J-132 - Multiple entry of the same date **OPEN** ◻ Q10J-131 - Time handling bug **OPEN**	141 132 131
Booking Reservations		‹› Q10J-116 - Booking and Reviews **TO DO**	COMPLETION	◻ Q10J-139 - No email verification for Experiences **OPEN** ◻ Q10J-133 - PaperPlane in E-mail field **OPEN**	139 133 129 138 137 130

Feature	Test Criteria	Test Suite Containing Cases for Objective	Testing Status	Identified Bugs By Objectives Tested	Bug priority by color
				🔴 Q10J-129 - Unable to select Date to make reservation in firefox OPEN 🔴 Q10J-138 - Reservation Info Page Typo OPEN 🔴 Q10J-137 - Reservation - window mode OPEN 🔴 Q10J-130 - Able to make double reservation OPEN	

Feature	Test Criteria	Test Suite Containing Cases for Objective	Testing Status	Identified Bugs By Objectives Tested	Bug priority by color
Reviews	• Only can leave after reservation date	`<>` Q10J-116 - Booking and Reviews TO DO	COMPLETION	🔴 Q10J-136 - Star Ratings are covered by submit button OPEN 🔴 Q10J-135 - Review - See More button OPEN 🔴 Q10J-134 - Reviews - Unable to select Submit button OPEN	136 135 134

Schedule / Coordination

Testing Entry Criteria

1. Environment is accessible on at least one browser.
2. Rudimentary account(User, Host Client) functionality.
3. Basic Search,Home page, Hosting and reserving.

Testing Exit Criteria

Monitoring and Control

1. Feedback regarding design/user experience.
   a. Slack/Trello.
2. Bug reporting procedure.
   a. Screenshot.
   b. Circle in red.
   c. reports can be found in Jira and Trello
3. Percentage of Test Cases vs Test executions.

1. Objectives met.
2. Defects reported, addressed. Complete retests taken place.

Monitor that defect reports are addressed, followed by 2 party verification on multiple platforms. That defect has been resolved.

⚡ Q10J-99 - Moment OPEN   Jira Epic Link

QA Jason Pritchard will design and execute test cases and refer to peers as necessary for change of perspective as well as accountability.

Test Summary

QA Jason Pritchard designed and executed tests in the scope of the User account. Based on assumed requirements, outlined in this test plan.

Metrics:

20 test cases with 35 executions.

5 blocked, 15 fail, 17 pass.

15 bugs identified

4 high priority, 6 moderate, 5 low impact

Assessment of testing:

Account creation is smooth however the user profile page is vague can could benefit from some clarification. For hosting experiences, other then the reported bugs, lack of ability to edit or delete is seen by tester as a massive risk. While searching the drop down field and filtering bugs will need to be addressed before launch. The newest feature Reviews was unable to be fully tested as the submit button and the Stars overlap making submit button is unclickable that will also require a rework or removal and later addition. There were a few reported Typos and Formatting issues that will also need to be addressed before launch.
